Editorial

Building on its heritage of more than 110 years, the Roger Pradier® team carries out its commitment to illuminate the outdoor spaces of our daily lives with passion.

At the start of 2024, we are proud to announce our ISO9001 certification, illustrating our dedication to quality and process management. This certification reflects our unwavering commitment and determination to offer our customers high-quality lighting fixtures and services.

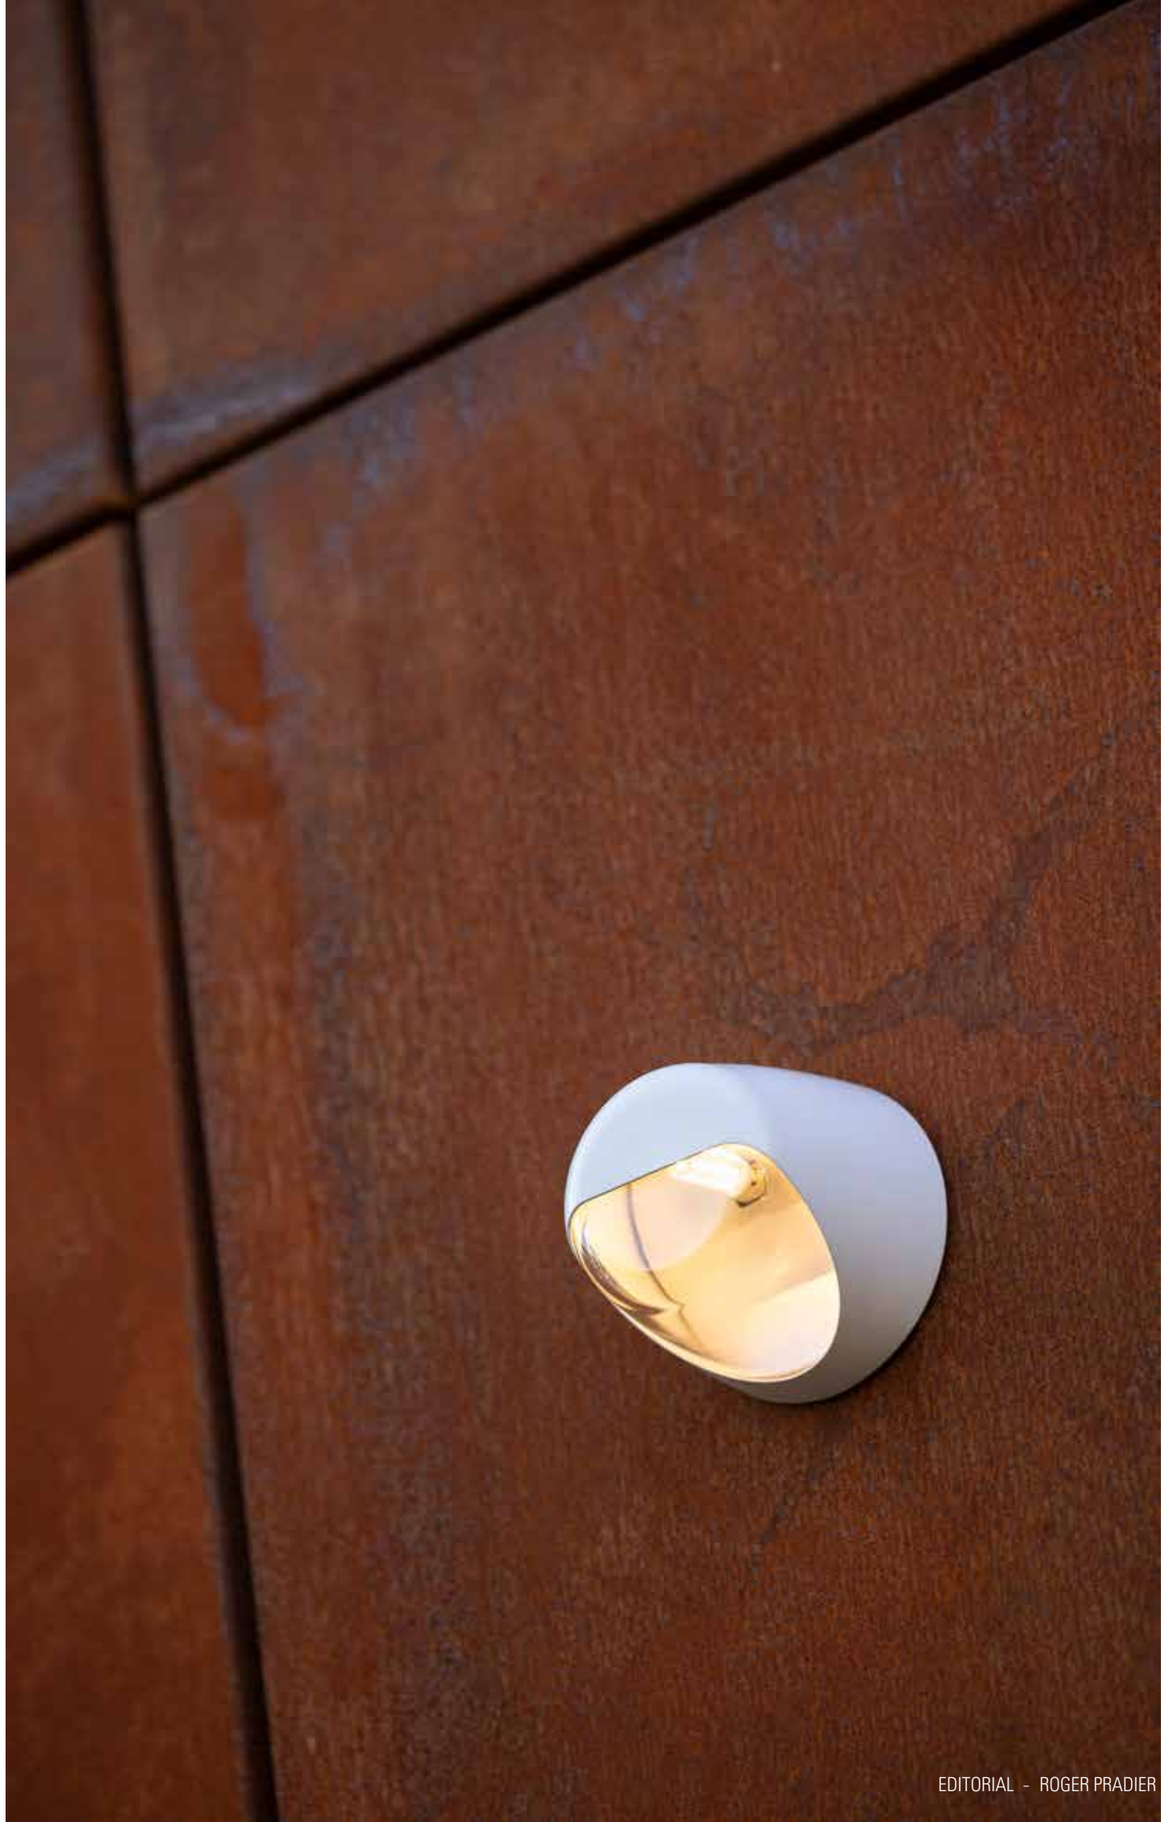

As a member of the Rivalen collective, which has been "société à mission" (French legal framework in which businesses pursue a set of social and environmental purpose with specific sustainability goals) since 2022, we set out our CSR (Corporate Social Responsibility) ambitions through a GESTe action plan based on 4 main axes: Governance, Environment, Social and Territory. Focused on the reduction of our impact, this approach structures our actions, which must be respectful of the environment and the stakeholders around us. These objectives are as much new challenges to take on as they are a framework for the creation of our luminaires. With this in mind, we are carrying out research into the evolution of our materials, enabling us to offer the possibility of limiting the use of varnishes to let raw materials age and evolve. We have also partnered with our neighbour Pyrex for an unprecedented collaboration that led to the creation of 2 models, Carex & Ronex, illustrating our commitment to the circular economy.

Our attachment to the Centre Val de Loire region continues with the completion of the expansion of our plant in Châteauroux and the commissioning of our brand new zero-VOC emission powder coating line. This is an important step in our development to approach the future with serenity.

We are also taking a new step in our international development with the "UL Manufacturer" certification of our factory, which strengthens our position to expand into the North American market.

We are excited to present you our collections as well as our new creations, and to share with you, our valued partners and customers, in France and abroad, a year rich in achievements and innovations.

Raw materials

Building on its mastery of noble materials and with the active collaboration of French designer François Azambourg, Roger Pradier® is committed to the ecological transition in lighting with this work on materials durability without resorting to surface treatments.

Copper and brass are characterized by their ability to age. Like fine wines, these materials improve over time by acquiring a natural patina. To inscribe this temporality in the manufacture of its lighting fixtures, Roger Pradier® now proposes them without coating. It's about not fixing their appearance and letting them, on the contrary, live and evolve to the rhythm of external elements by accepting that rain, sun and wind act and reveal another aesthetic.
This proposal for raw materials, free of any varnish, is also part of a general move to use less energy-consuming materials for the manufacture of lighting fixtures, without altering their intrinsic solidity or their operation.

Raw brass is a living material, which will evolve over time according to its environment.

Raw copper is a living material, which will evolve over time according to its environment.

This is an example of the evolution of materials over a few months, non-contractual photos.

Roger Pradier® warranties

25 year anti-corrosion warranty

The Roger Pradier® company commits itself to replace any faulty part that shows sign of corrosion in a period of 25 years from the date of acquisition by the final client, upon presentation of the purchase invoice.

The guarantee applies only to the Aluminium part of Roger Pradier® products installed above ground in accordance with industry standards and with the original surface treatment intact.

Exclusions: products that are scratched, scored, covered with silicone, cement, or any other material, or that have suffered collision or various chemical treatments. This guarantee also excludes any phenomenon that may modify the aspect of the surface over time, natural dirt, deposits of all types, etc…

The warranty requires the product(s) to be returned to the factory. No exchange prior to that return can be considered.
Roger Pradier® will only replace the damaged part and not the whole appliance; transport, dismantling and installation costs are not covered.

Roger Pradier® reserves the right to analyse or to have analysed, by any method of its choice, the damage caused by corrosion, in order to determine the reliability and the conditions of the said damage.
In any event, this guarantee does not apply to the various electrical components and accessories of the product.

5 year technical warranty

Other than the specific 25 year anti-corrosion warranty, Roger Pradier® products are guaranteed for 5-years. The technical warranty covers over a 5-years period from the date from the acquisition date by the final client, upon presentation of the purchase receipt. This warranty shall only apply to products installed according to standard practices and which are used in conformance with our recommendations. Any intervention or modification made to the product and its components is expressly excluded from this warranty.

The warranty requires the product(s) to be returned to the factory. No exchange prior to that return can be considered. Roger Pradier® will only replace the affected component(s) and not the whole appliance; transport, dismantling and installation costs are not covered.

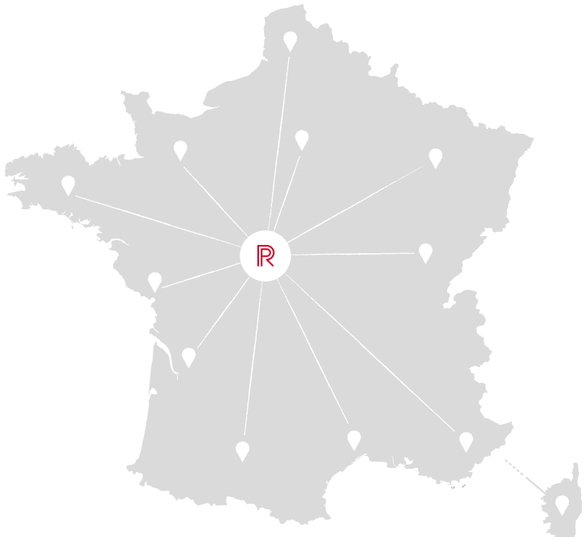

Roger Pradier® commitment

- A century's worth of experience as a French manufacturer of outdoor lighting fixtures
- Widely recognized expertise
- A culture of quality
- External inspections
- International certifications. Refer to the US catalogue for UL-listed references.

Our commitments

Being part of the **Rivalen** collective, which has been a mission-driven company since 2022, commits us to setting ambitious goals for our CSR approach, with an action plan based on **Governance**, **Environment**, **Social** and **Territory**.

Lighting designed and produced in Chateauroux

110 YEARS
of expertise and excellence

LOCAL
100% French manufacturing in our Chateauroux-based plant

MISSION
Convinced that local know-how and the values of our collective of companies are strengths to sustain their performance, we design and manufacture objects which decorate or furnish living spaces by placing quality and sustainability at the heart of our industry.

OUR VALUES
Audacity - Team spirit - Thoughtfulness - Humility

Deploying and leading our «GESTe» CSR approach

PROGRESS
Implementation of an action plan and a progress approach with quantified objectives

AWARENESS-RAISING AND TRAINING
- 100% of our employees made aware of the climate and circular economy fresco
- Our purchasing, design, sales, communication, and HR departments have been trained to integrate CSR specifically into their profession

MANAGEMENT
A digital tool to monitor GESTe and track the reduction of our carbon impact

INCLUSION
- Strengthened partnership with the ESAT (French support and work assistance establishment) in our home town
- Participation in Duo Days (where a volunteer employee welcomes a person with a disability to his or her workplace to help them discover the company and their job)

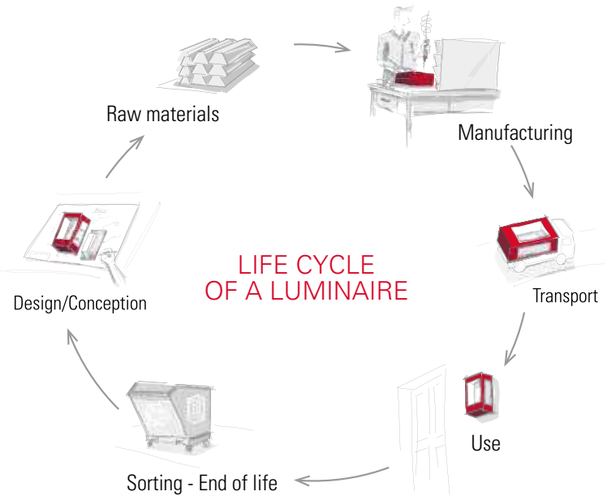

Measuring and reducing our environmental footprint

MEASURE
- Carry out our first carbon footprint assessment in 2022
- Diagnosis of our purchasing activities in 2023, with a view to responsible purchasing action plan

PROGRESS
- Definition of a carbon trajectory for 2025
- Implementation of around twenty actions to reduce our energy consumption at our Châteauroux plant

REDUCING WASTE AND PACKAGING
- Reducing our production waste
- Reduction of production and luminaires packaging

Incorporating the circular economy into the design, manufacturing and end of life of our lighting fixtures

ECO-DESIGN
- Life cycle analysis (LCA) of our best seller, Brick[2]
- Implementation of an eco-design methodology with the aim of ensuring that any new product in the catalog is eco-designed

MATERIALS
Study on the environmental impact of the materials of our lighting fixtures and on the solutions to put in place to reduce it

SECOND LIFE OF PRODUCTS
Continuous progress approach on the reparability, repair and recyclability of our lighting fixtures

INDUSTRIAL AND TERRITORIAL ECOLOGY
Implementation of an industrial and territorial ecology methodology at a corporate level which will be applied to Roger Pradier® (creation of incoming and outgoing flows)

Carex & Ronex

Design Stéphane Joyeux

Since childhood and with passion, Stéphane Joyeux, Roger Pradier®'s designer, has been collecting objects and materials to imagine new creations.
The Carex & Ronex lighting fixtures draw from this art of repurposing and anchor Roger Pradier®'s environmental commitments in a logic of circular economy.

Based on the conviction that we can design and manufacture with proximity, sustainability and circularity in mind, Stéphane Joyeux imagines an encounter that seems unlikely at first glance… that of Roger Pradier® and Pyrex, a French manufacturer of household utensils with remarkable glassmaking know-how. Both companies have been based in Châteauroux since 1970. The reason for this meeting is the borosilicate glass of which Pyrex is the leader and whose quality is to resist to important thermal shocks.

Stéphane Joyeux chose two containers from Pyrex's standard production, initially intended for food preservation and cooking, and transformed them into outdoor lighting by adding a clever support sheet and a light source. The metal sheets are cut out from scrap material coming from the production of fixtures in the Roger Pradier® collection and are simply pushed back before being cut out once and then lacquered.

La Hutte

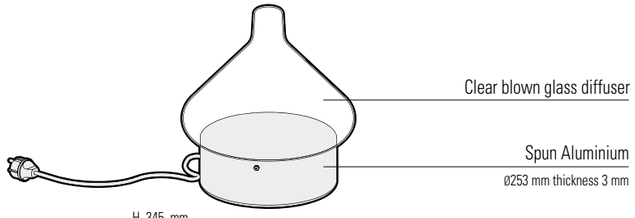

Design matali crasset

The “La Hutte” lamp draws inspiration from the shape of a primitive hut, a circular shelter built around the fire that was essential to life.
Its protective glass casing is like the walls of a house, storing and then releasing photons. “La Hutte” is a shelter, a kindly presence that reproduces the warmth and light of a home fire.
The lamp consists of two elements: a metal base available in all colours, and a transparent blown glass diffuser. The design comes in three versions, either a table lamp, a model you can hang, or a floor lamp.

Bollards with Green'Up socket

Green'Up socket for electric and hybrid vehicles

The EV socket is reinforced to safely support an intensity of up to 16 Amps, which reduces the charging time of your vehicle by almost half, particularly if it is equipped with a Green'Up cable.

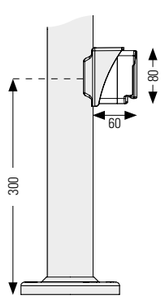

Type E socket - Other types on request.

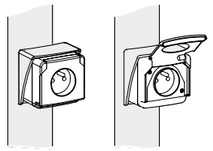

Exclusively on Tetra Model 4
p.48

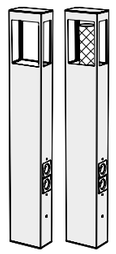

Bollards with IP55 sockets

Country-specific sockets
Separate power supply: socket/light

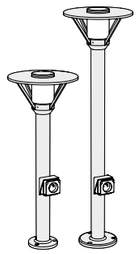

Nota bene : The standard sockets integrated into Roger Pradier® bollards can withstand a maximum intensity of 8 Amps and are therefore not suitable for charging an electric vehicle.

Commitment against light pollution

Roger Pradier® is committed to complying with the new regulations against light pollution. In France in particular, the Decree of 27 December 2018 on the prevention, reduction and limitation of light pollution regulates lighting practices. Since 1 January 2020, these provisions apply to «light installations» in order to be consistent with today's environmental issues.

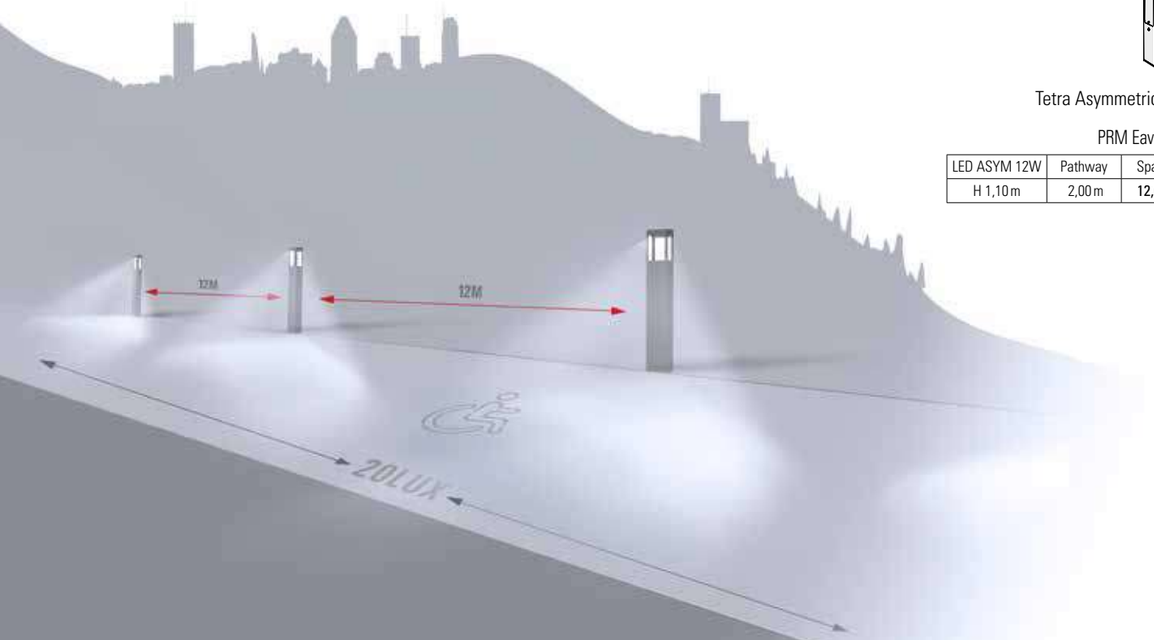

Colour temperature ≤ 3000K
ULOR < 1%

Compliance with PRM standards (Person with Reduced Mobility)

Any external path must be structured in such a way as to allow any user, and in particular persons with reduced mobility (PRM), access to the entrance of an establishment open to the public. For this path to be accessible, taking into account the transition zones, its horizontal mean illumination level (Eav) to be maintained at ground level over its entire length must respect 20 lux average (according to the legislation of each country).

Many Roger Pradier® luminaires make it possible to meet PRM requirements. They can be identified in the pages of this catalogue by the presence of a PRM table. Some collections, such as Tetra and Hector, offer special performance thanks to the Asymmetrical LED technology that allows spacing of up to 12 m for bollards and 25 m for poles, while respecting the Eav = 20 lux.

Hector Asymmetric p.42

PRM Eav 20 lux

LED ASYM 35W	Pathway	Spacing
H 3,00 m	3,00 m	**25,00 m**

Tetra Asymmetric p.48

PRM Eav 20 lux

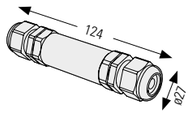

LED ASYM 12W	Pathway	Spacing
H 1,10 m	2,00 m	**12,00 m**

Ingress Protection (IP) ratings

The degrees of protection (IP) are defined by the french standard NF EN 60-529

IP x_ : protection rating against solids

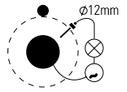

IP 0_ — No protection

IP 1_

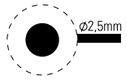

Protected against solid foreign objects
over 50 mm in diameter
(e.g. involuntary contact with the hand)

IP 2_

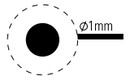

Protected against solid foreign objects
over 12 mm in diameter
(e.g. finger)

IP 3_

Protected against solid foreign objects
over 2,5 mm in diameter
(e.g. tools and wires)

IP 4_

Protected against solid foreign objects
over 1 mm in diameter
(e.g. small tools and wires)

IP 5_

Dust-protected
(no harmful deposits)

IP 6_

Totally protected against dust

IP _x : protection rating against liquids

IP _0 — No protection

IP _1

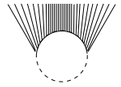

Protected against vertically dripping
water (e.g. condensation)

IP _2

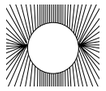

Protected against dripping water
up to 15° from vertical

IP _3

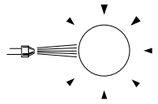

Protected against direct spray of water
up to 60° from vertical

IP _4

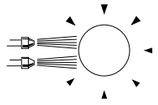

Protected against direct spray of water
from all directions

IP _5

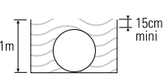

Protected against jet of water from all
directions applied by spray lance

IP _6

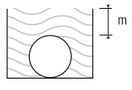

Protected against direct sprays of water
comparable to big waves

IP _7

Protected against the effects
of immersion

IP _8

Protected against long periods
of immersion under pressurede

Glossary

«Boomerang»: wall mounting plate

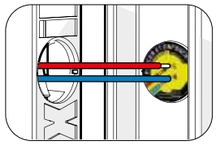

Can be easily and quickly mounted to any surface.
Allows pre-installation.
Isolates the Aluminium casing from the wall.
Wall light can easily be rotated and locked in place.

«Easycap»: waterproof quick-connect system

«Easycap» is a patented membrane that allows wires
to be directly connected.

Solid-core wires can be directly pushed through the membrane.
For stranded wires, the installer must crimp cable terminals first.

Information

Each reference is a complete product.

Light bulbs are not included.

All standard Roger Pradier®'s electrical plugs are Schuko type F (mobile models).

Models in brass or copper are provided with black Aluminium supports.

The steel supports are not covered by the anti-corrosion warranty.

The coating of brass, copper, zinc, stainless steel, or enamelled steel models can deteriorate depending on the climate or the environment. These materials are not guaranteed against oxidation.

It is recommended to regularly maintain the light fixtures in accordance with the practices of the profession and to prohibit the use of any abrasive or corrosive material or product.

Our terms of sale are listed on the back of our delivery notes and bills.

As part of its constant strive to improve the quality of the light fixtures, Roger Pradier® reserves the right to modify, without notice or compensation, all or part of the equipment presented in this catalogue.

The images, dimensions and scenarios in the photographs in this catalogue cannot be regarded as contractual.
